PROFESSIONAL SUMMARY

MCA student specializing in Generative AI and Machine Learning, experienced in building LLM applications, AI agents, RAG pipelines, NLP systems, Computer Vision applications, and predictive ML models. Skilled in Python, FastAPI, Flask, LangGraph, LLMs, XGBoost, Scikit-learn, and REST APIs, with hands-on experience in AI automation and model deployment.

TECHNICAL SKILLS

Programming: Python, Java, SQL, JavaScript, HTML5, CSS3

Generative AI & ML: Generative AI, LLMs, AI Agents, RAG, LangGraph, NLP, Computer Vision, XGBoost, Scikit-learn, TensorFlow, Predictive Modeling, Feature Engineering

Frameworks & Tools: FastAPI, Flask, React, REST APIs, Git, GitHub, Jupyter, Google Colab, Docker

Databases: MySQL, SQLite, MongoDB, Redis, Firebase

FREELANCE EXPERIENCE

Freelance Web Developer

- Designed, developed, and deployed custom, responsive digital invitation websites using HTML, CSS, and JavaScript.
- Managed end-to-end client requirements, independently executing projects from UI/UX design to final deployment.

TECHNICAL PROJECTS

Leo 2.0 – Personal AI Assistant | Python, Groq, OpenRouter, Ollama, AI Agents, Automation

https://github.com/Lingeshkumar24-code/Leo_personal_assistant

Built a desktop AI assistant for voice interaction, coding support, system automation, multilingual conversations, and task execution. Integrated an offline fine-tuned LLM for local/private conversations and fallback operation, alongside model routing and tool-based workflows for email, browser, and system tasks

F1 Race Prediction System | Python, ML, ChromaDB RAG, LangGraph, AI Agent

<https://github.com/Lingeshkumar24-code/F1-Racing-AI>

Built an AI race-engineer assistant using agent workflows for context-aware race strategy guidance and decision support. Added ChromaDB RAG for FIA regulations and historical race reports, with ML models for tire-life prediction and pit-stop recommendations

AI Interview Assistant | Python, Flask, LLMs

github.com/Lingeshkumar24-code/-Interview-AI--based-on-Resume

- Built a Flask application that parses PDF resumes and generates role-specific technical and HR interview questions.
- Added an interactive mock-interview mode to evaluate candidate responses for interview preparation

FaceMeme AI – Real-Time AI Meme Reaction Camera | Python, FastAPI, MediaPipe, OpenCV, WebSockets

<https://github.com/Lingeshkumar24-code/facememes>

Built a real-time Computer Vision system for facial emotion, hand gesture, and pose detection, trained on Indian meme datasets. Implemented 15+ meme categories, 300+ captions, WebSockets, confidence tracking, meme generation and caption

BhashaVoice AI | Python, FastAPI, React, NLP, LLMs

github.com/Lingeshkumar24-code/BhashaAi

- Built an Alexa/Siri-like AI voice assistant using LLMs, Speech-to-Text (STT), Text-to-Speech (TTS), and NLP.
- Supports English, Tamil, Telugu, Kannada, Malayalam, Hindi, and code-mixed conversations with LLM-based intent understanding.

AI Fitness & Health Prediction System | Python, Flask, XGBoost

<https://github.com/Lingeshkumar24-code/AI-Fitness-Health-System>

Developed an XGBoost-based ML model for calorie prediction and personalized fitness recommendations.

Implemented data preprocessing, feature engineering, model training, and Flask deployment.

AI Health Appointment Navigator | Python, FastAPI, SQLAlchemy, SQLite, OpenStreetMap

<https://github.com/Lingeshkumar24-code/AI-Health-Appointment-Navigator>

Built an AI-powered healthcare recommendation system for symptom classification, hospital discovery, and doctor matching.

Developed FastAPI REST APIs with location-based search and database-backed appointment management.

EDUCATION

Master of Computer Applications (MCA) – Generative AI Specialization

CGPA: 8.2

Alliance University, Bengaluru

Bachelor of Computer Applications (BCA)

88.86%

K.L.E. S. Nijalingappa College, Bengaluru City University
